

# Hear Technologies Introduces the Hear Back PRO Virtual Mixer

*All the features of the Hear Back PRO Mixer in a small card*

**May 17, 2017**

Huntsville, AL – Hear Technologies announce the release of the Hear Back PRO Virtual Mixer. It boasts all the features of the Hear Back PRO Mixer in a small card format.

Always on the cutting edge, the Hear Technologies team has yet again taken the initiative to develop and add another ingenious product to its PRO line, expanding the capabilities of the Hear Back PRO system.

The small card format of the new Hear Back PRO Virtual Mixer allows it to fit into the Hear Back PRO Hub. The Hub can be populated with up to four Virtual Mixer cards, and an unlimited number of Hubs can be connected together for larger systems.

## **Key Features and Functions**

Controlling the Virtual Mixer is easy using the new Hear Back PRO iOS app on any iOS device or even another Hear Back PRO Mixer. This key feature is great for controlling wireless in-ear monitor or standard stage monitor mixes. The app also allows the user to easily drag and drop which iOS devices and Hear Back PRO mixers control each Virtual Mixer.

The PAIRING button (and LED indicator) makes it easy to configure which iOS device or Hear Back PRO Mixer(s) will be controlling each Virtual Mixer.

The new Hear Back PRO Virtual Mixer can be used to mix 16 or 32 channels of audio for your wireless in-ear or standard stage monitor rig.

Up to four presets are available with the Virtual Mixer, and it has the capability to save all settings in case of power loss.

As an added feature, you can use the Hear Back PRO Virtual Mixer to add a remote stereo balanced audio output to your existing Hear Back PRO mixers.

Other features include:

- Volume, pan and stereo placement of each audio channel
- Control master, auxiliary input and intercom transmit volumes
- Automatic incoming intercom leveling
- One auxiliary 1/8-inch stereo unbalanced audio input
- XLR balanced left and right outputs

The Virtual Mixer provides all the functionality of the Hear Back PRO mixer to your monitor setup and control from the palm of your hand with the new Hear Back PRO iOS app.
