

Introducing the Switch Back M8RX Personal Interface from Hear Technologies *A preamp and multi-channel headphone monitoring interface*

April 12, 2017

Huntsville, AL - Hear Technologies has added a new pro audio tool to its lineup. With many capabilities and an intuitive design, the Switch Back M8RX is actually two products in one. This gives the individual a choice to play live, record, or monitor their mix all in one single tool.

M8RX is a personal interface to be used for live sound or recording, and a multi-channel headphone monitoring system. Compact in size to fit any situation, the M8RX gives individuals choices to use it in multiple ways like having mini recording studio setup, or a simple communication system.

Our engineers created the sleek compact look and feel of the M8RX to give individuals the option of hanging it from a belt, mounting it on a mic stand, or setting it on a table. Hear Technologies will be manufacturing the M8RX in the U.S. to make sure our customers get the quality they have come to expect.

The research and design Hear Technologies put into the M8RX is what sets it apart. M8RX has a total of eight channels of audio mixing – two studio-quality microphone preamps, two channel line-inputs, and four Dante network audio inputs/outputs.

About Hear Technologies

Hear Technologies offers unique and affordable solutions for personal and professional monitoring systems. We provide options for everyone – from beginners to seasoned pros. Our digital solutions give everyone the mix they need to perform their best. We design our products with the user in mind, so Hear gear is easy to use right out of the box, while providing the best sound in the business. Whether or not you've used a personal monitor mixer, the straightforward layouts of our powerful systems make getting the right mix a quick and effortless experience. Hear Technologies sets the bar high for quality sound, breaking new ground in the market to provide our customers with peak pro audio performance.
