

## **Hear Technologies Introduces the Waves SG Bridge**

*The gateway to award-winning Waves® processing on a Dante® network*

**April 12, 2017**

Huntsville, AL - Building on the solid track record for manufacturing great PRO audio equipment, Hear Technologies has partnered up with Waves Audio® to develop the Waves SG Bridge. To fill an ever-growing need to give Dante® users access to Waves' powerful processing capabilities, the Waves SG Bridge is the best, most cost-saving solution on the market.

Waves SG Bridge simultaneously transmits up to 64 channels of audio from Waves SoundGrid® to Dante® and 64 channels from Dante® to Waves SoundGrid®. By providing 64 channels of bidirectional audio between the two protocols with sampling rates from 44.1kHz up to 96kHz, we're providing yet another innovative tool to our innovative customers.

### **About Hear Technologies**

Hear Technologies offers unique and affordable solutions for personal and professional monitoring systems. We provide options for everyone – from beginners to seasoned pros. Our digital solutions give everyone the mix they need to perform their best. We design our products with the user in mind, so Hear gear is easy to use right out of the box, while providing the best sound in the business. Whether or not you've used a personal monitor mixer, the straightforward layouts of our powerful systems make getting the right mix a quick and effortless experience. Hear Technologies sets the bar high for quality sound, breaking new ground in the market to provide our customers with peak pro audio performance.
